DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: the word "and/or" is not enabled in the specification. Appropriate correction is required.
2. Claims 1-13 are objected to because of the following informalities: the word "hereinafter called " is usually used in the specification rather than the claim language . the use of the sentence multiple time in the same claim " the method additionally comprising the step of " is better to be preventable in order to simplify the steps and language of the claim.
3. Claim 3-6; and 9-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim *should refer to other claims in the alternative only--*, and/or, *--cannot depend from any other multiple dependent claim*. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.
4. The Claim are also objected since the amended to the claims filed 2/4/2005 does not perfectly comply with the requirements of 37 CFR 1.121(c) because there are some limitation in claim 1 that was added and was not underlined starting from " wherein the indexes appear in the form.....entropy of bidimensional histogram". Note that Examiner considered the amendments in order to expedite prosecution . Amendments to the claims filed on or after July 30, 2003 must comply with 37 CFR 1.121(c) .p

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-2, 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.
7. Regarding claims 1, the phrase "in such a way" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) **1-2** are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an

article or material) to a different state or thing (Reference the May 15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Processes' under 35 U.S.C. 101"). The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

NOTE: Regarding the rejection of claims 1-8, please see the Memorandum dated May 15, 2008, "Clarification of Processes under 35 USC § 101" which may be viewed at the following web address:

http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/section101_05_15_2008.pdf

NOTE: Examiner did not find any relevant prior art to reject claims 1-2, 7 and 8 since there is a rejection under 112 and 101 and the claims are unclear and confusing.
